COMMERCIAL, RETAIL, AUTO, FABRICATION

KSF, manufactures two series of glass lifts: a portable unit with a load capacity of 120 kilograms for roof glazing, and an autonomous unit with a load capacity of 300 kg for roof and front glazing that also functions as a multipurpose material lift at the construction site or workshop. The portable unit is powered by a variable speed motor; the autonomous unit is battery-powered. Both products feature a folding base, set up in 10 seconds without tools and can be transported easily. The KSF glass lifts are available in North America through KEM.TECH –CH, Geneva, and meet the latest safety standards.
